# 4-H Evaluation & Qualtrics
The Future of Evaluation

November 8th & 9th, 2018
Hartford, CT

Why Qualtrics?

- Qualtrics makes collecting data easy

- Qualtrics is a data management system not just a data collection system.

- Qualtrics allows for easy collaboration within organizations and outside organizations.

- Qualtrics is becoming a one stop shop for anything data.

- Lastly, I'm a total data nerd…. but Qualtrics is fun!

Logic Sets & Statements

- Overview of Logic: Basically If Then Statements.

- IF: If something happens (x) then (y) happens.

- And: Requires that both conditions must be met:

- OR: Requires that either of the conditions must be met:

- Skip Logic: More useful for skipping a respondent to the end of survey or past a block of questions.

- Display Logic: More useful for displaying questions based on previous answers

The End

- Qualtrics Support is extremely helpful, some of the best customer service I have seen.

- There are tons of resources on Qualtrics Support Page with in depth articles and webinars.

- Qualtrics is available for what you make it, no matter your skill set. You don't have to be an expert to get a lot out of it.
