

SPARE A WATT, SAVE A LOT!

The average person uses 909 Watts per month

W(H)att??

is a method of measuring the rate of energy transfer of an appliance

WE ENCOURAGE YOU

- Reduce your time using electronics by an hour each day
- Turn off the lights when you leave a room
- Safely unplug items from a wall when they are not being used

12-Watt LED bulb produces 75-80% less

energy than a 60-Watt bulb
